

MIL/MC3005 Military Battery Charger

- 2 way charger for military Nickel Cadmium batteries. Also available as 3, 4 or 5 output.
- 115/230V ac, 24V Batteries can not be charged from dc input
- Robust construction and easy grip handles for portability

Charger functions include:

- Pre charge test – to check battery fit to charge
- Normal charge – 14 hour timed charge
- Balance charge – trickle charge to maintain capacity at completion of normal charge.

The MIL/MC3005 is designed for charging most types of military battery. The unit is designed and manufactured in the UK giving the user unbeatable product support.

Function	Value
Nominal battery voltage	6V to 24V
Normal charge current	400mA – depends on battery
Balance charge current	200mA – depends on battery
Charge termination	Timed
Number of channels	2
Output	Flying lead
Output power	60 Watts
AC supply voltage	110V/230V ac internally switched 50/60Hz
Charging temperature	0°C to +55°C
Storage temperature	-20°C to +70°C
